CRAFT IDEAS: BY LISA GERINGER

No Sew Fleece Blanket

Your blanket can be any size. Fleece comes 60-inches wide, so your blanket can be 60 x ??? Your finished product will be about 10-inches smaller than the fabric you start with.

Step 1: Choose the Fabric

Choose a print and a contrasting or matching solid. I like to use strong, bold contrasts. You will need a solid and a print that are the same size. My sample uses a nice dark hunter green for the back. For a lap blanket or child blanket, use 1 yard of each. To make a larger blanket, use 2 yards each. You can buy panels as well and just have the person cutting the fleece give you the same amount of the 2nd piece unless you are doing two panels (same design on each side).

Step 2: Line Up the Two Fabric Pieces

Line up the two fabrics, right sides OUT. Anti-pill solids are FUZZY on the right side. Anti-pill prints will be more distinct on the front side. Regular prints are hard to tell -- use the side that appeals to you.

Step 3: Trim to the Same Size

Trim the two pieces so that they are the same size.

Step 4: Cut out the Corners

Cut a 5 inch square from each of the four corners.

Step 5: Cutting the Fringe

Cut fringe on all four sides of the blanket. Cut through both layers of fabric at the same time. Fringe pieces should be a little wider than the width of your finger. I cut at least 1-inch strips but it doesn't have to be perfect. You won't be able to tell when you are done. Cut in from the edge 5 inches. You can lay a yard-stick across the fabric, 5 inches from the edge so that I know how far in to make my cut.

Step 6: Begin Tying Knots

Tie the corner strips together. Using a simple knot, attach the bottom layer to the top layer. Don't worry if the fleece puckers. Use flat hands to stretch and smooth the material so it lies flat again.
